Organiser's Comments

Many thanks to all NOC helpers for their enthusiastic support.

Sincere apologies for competitors who had to be given a recycled map, and thanks to those who gave up their map so all could have a run. This should not have happened! No excuses

Thanks to all who turned up on the day. With the exception of the above, there appeared to be no adverse comments.

Steve Wright

Planner's Comments

My first trip to Sherwood Forest in August proved to be a very frustrating one. Many blocks of forest-run proved to be impassible due to the undergrowth, other areas were spoiled by recent felling, and many paths were overgrown. I returned home with my body and plans in tatters.

Subsequent visits offered more encouragement and I eventually found a way to use the area to my general satisfaction. I hope that your course provided an appropriate level of technical difficulty without being too rough underfoot.

For those of you from the east start it was best to stick to the paths at the beginning of your course. Only as you approached the area to the south of control 120 was it "safe" to cut across the forest.

I am looking forward to examining the split times to see were you encountered difficulties. I wonder how many of you erred on your way to control 1 on the Light Green course.

Sorry about the water dip on the way to the finish: it wans't there in August.

Paul Morris

Controller's Comments

Autumn, the season of mists and mellow fruitfulness, is not the time of year to orienteer in Sherwood Forest. The summer growth of brambles and bracken is such that, not only huge tracts of forest, but also significant numbers of rides and paths are impassable. It becomes much more attractive as an orienteering venue after the frosts and snows of winter. There is, however, a demand for orienteering throughout the year and so our forests must be used in less than ideal conditions.

I trust that you were not too disappointed by the state of the forest or the design of the courses. Having visited most of the forest on a number of (painful) occasions, I can assure you that there were many areas much worse than those you were taken through and that the planning made optimum use of the area.

I'm sure that all NOC members are extremely apologetic over the fact that there was an insufficient number of maps but the attendance was well beyond anyone's wildest dreams. Thanks for coming. I trust you enjoyed the beautiful weather if not the brambles and bracken.

With apologies to Keats,

Peter Hubberstey
